<u>Supplier</u>	<u>Value</u>	<u>Quantity in Tons</u>
Klockner, Germany	4,230,000 DM	30,000

A comparison of the two tables shows that for the current year 1951, the Soviet Zone has concluded contracts for three times more crude iron than it had during a comparable 1949/50 period. It also appears significant that the loss of Western suppliers is more than compensated for by imports from the Soviet Union.

3. All crude iron imported from the USSR into the Soviet Zone is distributed to the various factories by the Eisen-und Stahl-Grosshandel GmbH, Leipzig. The latter's ratio of distribution indicates that 55 per cent. of all USSR crude iron deliveries are distributed to SAG plants:

SAG Marten	72,682 tons
" AVO	39,810 "
" Transmasch	6,338 "
" Artovelo	100 "
All SAG plants	119,830 "
All VEB plants	92,000 "
	<u>211,830 tons</u>
